

It's The Time Of Year When The Thermometer Is In The Red Zone.

Temperatures are soaring, and despite the gas prices, miles are being driven. Vehicle owners are rushing to have their radiators, radiator caps, water pumps, hoses, and thermostats fixed.

The cooling system removes heat from the engine. Different driving habits, operating conditions, types of coolant, and styles of vehicles require special attention to the cooling system. After all, 40% of engine downtime is cooling system related.

How would answer the following questions:

- Is the vehicle overheating?
- Does the temperature dial often move towards the extreme allowable temperatures?
- Is there a sweet odor?
- Does fluid repeatedly need to be added to the system?

Penray's Cooling System Re-Charge Kit Is The Solution!

- Prevent the #1 cause of highway breakdowns- coolant failure
- Safely clean the entire cooling system
- Eliminate overheating and scale build-up
- Inhibit rust and scale
- Prolong the life of cooling system components
