

Introducing

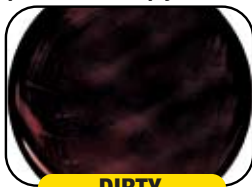

TRANSMISSION MVP **Multi-Vehicle Protectant**

The Driving Force Behind Preventive Maintenance!

- Synthetic Technology Protectant and Modifier
- Compatible With Almost All ATF
- Enhances Dexron/Mercon to perform like a Highly Friction Modified ATF such as: Honda, Chrysler ATF+3(7176), ATF +4(9602), Toyota Type T IV and other HFM fluids
- Enhances Dexron/Mercon ATF into a highly stable fluid such as Mercon V or Dexron VI
- Helps Improve Oxidation Stability
- Reduces Acid Number, Sludge, & Component Wear
- Prevents Torque Converter Shudder
- Ensures & Maintains Proper Shifts
- Prevents Overheating, Foaming & Oxidation
- Extends Frictional Stability & Fluid Change Intervals

Heat build-up is the #1 enemy of a transmission. Fluid must remain clean of all dirt to ensure that it can keep the system cool, lubricated and provide the necessary pressure to keep your vehicle moving.

DIRTY

As fluid ages, contaminants build up and viscosity breaks down leaving your transmission vulnerable.

CLEAN

New fluid protects the sophisticated technology in present day transmissions. Fluid helps to reduce component failure while improving performance and increasing vehicle longevity.
